

SRT 22

PRODUCT DESCRIPTION

The SRT series Search and Rescue Tents are ready for use within minutes, offering quick and practical setup with minimal labor, helping to create safe spaces and meet shelter needs during disasters and emergencies. They are durable and can be efficiently used in challenging terrain conditions. Sönmez SRT Search and Rescue Tents are reliable and provide easy logistical capabilities. The integrated modular design allows for quick assembly and practical installation with minimal labor.

Fast and practical maintenance with the repair kit, natural ventilation with window features, maximum protection with the ground tarp, insulation, and a wide range of accessory options.

Sönmez SRT Search and Rescue Tents come in 4 models, ranging from 22m² to 56m².

PRODUCT DETAILS

Frame

Made from double-sided PVC-coated polyester fabric, the material weighs 1000 gr/m². The beams are anchored to the ground. It features easy setup and portability. Depending on the size of the tent, setup is completed in 5-8 minutes. The high pressure in the frame is balanced with a relief valve.

Tent Cover

The tent is made from double-sided PVC-coated polyester fabric, weighing 650 gr/m². It is flame-retardant, waterproof, and antibacterial.
